Bird are a vital component of any ecosystem and play a crucial role in pollination, seed dispersal & pest control. Interesting behaviour, attractive colours, melodious calls/songs (acoustics), ecological services etc. has attracted many to pursue Ornithology (science of birding) as carrer path.

Birds inhabit every continent, and are among the most diverse vertebrate groups on Earth. Out of 1256 species recorded in India, more than 430 bird species are reported from Belgaum (Belagavi district) region by a team of dedicated birders. This high diversity is due to the mosaic of natural habitats that includeTropical evergreen, deciduous forests, grasslands, thorny scrub, rock outcrops and arid landscape spread across wet and dry

This brochure includes information (English name, Marathi name, Kannada name)on 157 species of commonly found birds in the Belagavi region . Common names of birds as per - Praveen et al. 2016

Legend

IUCN Status - International union for conservation of nature assigns each species to a red list category based on the threat assessment

Least Critically Endangered (CR) Endangered (EN) Vulnerable (VU) Near threatened (NT)

Extinct (EX)

This brochure is published by S.K.E. Society's Govindram Seksaria Science College, Belagavi, for mass awareness and to popularise birding in different age groups in the region.
